AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A compact disc processing system comprising:
 - a printer for printing indicia on a first compact disc;
 - a recorder for recording information on the first compact disc; and
 - a transporter carriage for ~~holding~~ gripping the first compact disc and moving the first compact disc between the recorder and printer, the transporter carriage comprises a single gripping head rotatable about a horizontal axis and having first and second gripping locations each for respectively ~~holding~~ gripping the first and a second compact disc simultaneously, such that the first and second compact discs are held in fixed relative positions coextensive along a common axis in different planes while the first and second compact discs are engaged by the gripping head.
2. (Original) The compact disc processing system of claim 1 wherein the transporter carriage holds the first and second compact discs using a vacuum.
